Profile

Second-year Industrial Engineering student at RIT Dubai with experience spanning financial management, quantitative analysis, and technical project delivery. Skilled in Excel/Sheets, Python, and stakeholder communication, with a track record of turning ambiguous problems into structured, actionable outcomes — from overseeing a six-figure student government budget to winning a systems-design case competition and shipping client websites independently.

Education

Rochester Institute of Technology (RIT Dubai)

Expected May 2030

B.S. Industrial Engineering, CGPA 3.79/4.0

Relevant coursework: Engineering Design, Calculus, Programming for Engineers, Probability & Statistics

Dean's List, RIT Dubai (2025–Present) | A-Level: 3 A grades | High School: 4.0 GPA graduate

Experience

Finance Director | RIT Dubai Student Government

Aug 2026 – Present

- Oversee a six-figure (AED) annual budget across nearly 30 club treasurers, managing allocations, approvals, and financial reporting.
- Built financial tracking and reporting structures to support transparent, auditable decision-making club-wide.

Freelance Web Developer | Self-Employed

2024 – Present

- Design and deliver custom websites for small-business clients on a project basis, managing each engagement end-to-end from requirements through delivery.

Finance Coordinator | RITMUN Club, RIT Dubai Model United Nations

Sep 2025 – Present

- Built structured Excel/Sheets workflows to track payments, sponsorships, and expenses, standardizing budgeting across club activities.

Assistant to Chemistry Tutor | Dr. Nervana ElKhadragy (Remote)

Aug 2024 – Sep 2026

- Designed structured tracking systems for scheduling, homework, and topic-level student performance, cutting prep time ~30%.

MUN Trainer of Delegates & Chair | Al Ma'arifa International Private School

Jan 2025 – Jan 2026

- Trained delegates in argumentation and public speaking; chaired the ILO committee (2025) and moderated weekly sessions.

Projects

Odoo ERP/CRM Case Competition — 1st Place | Team of 3

Fall 2025

- Led a freshman team to design and present an ERP/CRM system for a case-study company, beating five teams composed mostly of upperclassmen.

Implied Volatility Surface Plotter | Python, NumPy, SciPy, Matplotlib

2026

- Built a Black-Scholes implied-volatility tool using numerical root-finding to invert option prices and generate 3D volatility surfaces.

Skills

Analytical: Problem structuring, quantitative reasoning, data organization, process improvement

Tools: Excel, Google Sheets/Forms, Google Workspace, Microsoft Office, MATLAB (basic), Python (Pandas, NumPy, SciPy, Matplotlib), C++, HTML/CSS

Languages: Arabic (Native), English (Fluent), German (B1)
